MARK 10[™] CX 90

BIAS HIGH EQ 70µS

Lifetime Guarantee

Made in U.S.A.

Pictured above, the unique Mark 10 bridge insert, plus the crystal clear shell, makes the SHAPE MARK 10 extraordinary compared to other audio cassettes.

Increased rigidity and control over the ever-present variables of tape to shell alignment, azimuth, height, tilt, tangency and contact, ensure a maximum amount of tape surface to correctly track across the heads of the recording mechanism. These factors result in a dramatic audible enrichment in any magnetic program.

Type II 90 minutes @ 1 7/8 ips [2x45]

Design and mechanical patents issued or pending worldwide.
